1067 W. 17TH ST., SAN PEDRO, CA 90731

310-547-2687/310-547-2606(fax)

USE OF OXALIC ACID

- 1. BLEACHING TEAK DECKS (OR EVEN YOUR PINE DECK AT HOME)** DISSOLVE 1/3-1/2 CUP OF CRYSTALS IN A GALLON OF WATER. APPLY WITH BRISTLE BRUSH, SCRUB LIGHTLY. LET SOAK INTO WOOD UNTIL DESIRED WOOD TONE IS ACHIEVED (10-15 MINUTES?) RINSE THOROUGHLY TO NEUTRALIZE ACID. MAY ALSO BROADCAST CRYSTALS OVER WET SURFACE, SCRUB LIGHTLY AND RINSE WELL.
- 2. REMOVING RUST FROM METAL SURFACES.** DISSOLVE 2-3 TABLESPOONS WITH A GALLON OF WATER (EXPERIMENT QUANTITY DEPENDING ON EXTENT OF RUST) BEST TO SOAK METAL OBJECT IN SOLUTION FOR UP TO AN HOUR. IF UNABLE TO SOAK, CONSTANTLY BRUSH ON, RETAINING WET SURFACE TO GAIN DESIRED EFFECT..... A ZINC PHOSPHATE COATING IS LEFT ON SURFACE WHEN DRY. PRIME RIGHT OVER THIS SURFACE.....IT ONLY EATS RUST, AND WILL NOT HARM PAINT, CHROME OR GLASS. I HAVE HAD NUMEROUS TESTIMONIALS TELLING OF REMOVING RUST FROM OLD CANS AND BOTTLECAPS IN AS LITTLE AS 15 MINUTES! RAVE REVIEWS!
- 3. REMOVES RUST AND OXIDES FROM ROCKS, GEMS & CRYSTALS.** FOLLOW SAME INSTRUCTIONS AS REMOVING RUST FROM METAL SURFACES. ALSO GREAT FOR REMOVING RUST STAINS FROM BATHTUBS AND TOILET TANKS.
- 4. REMOVES IRON OXIDE OFF LEATHER.** WHEN VEG-TAN LEATHER COMES IN CONTACT WITH ANYTHING METAL, IT LEAVES A BLACK IRON STAIN. SO BEFORE THE LEATHER CAN BE DYED & FINISHED WITH A SEALER, IT HAS TO BE CLEANED OF THE IRONOXIDE THAT IS ABSORBED BY THE LEATHER.

ALWAYS WEAR RUBBER/LATEX GLOVES AS IT WILL FIND ANY SCRATCH OR OPEN CUTS ON HANDS..... FRESH WATER QUICKLY EASES ANY DISCOMFORT.

KEEP OUT OF REACH OF CHILDREN
